Bull Will's corporate culture places strong emphasis on the continuous enhancement of product R&D, material application, and the craft of production. We promise to provide customers with excellent service, high quality products and flexible production scheduling in a responsible manner to foster a prosperous and sustainable relationship. We expect our employees to be diligent, professional, ethical and customer-oriented, so Bull Will may further develop a professional and leading company in the manufacturing of electronic components.

Company Overview: Company Introduction and Scope of Business

I. Company Introduction

- Established date: December 20th, 1993
- Listing date: September 17th, 2003
- Income capital: NTD 195,342,060 Chairman: Chieh-Ming Chang
- 2006: Invest in BWJC
- 2007: Invested by Serial System Ltd., Singapore-listed company
- 2010: Set up Dongguan Zhao Kang Electronic Co., Ltd. And Huizhou Bullwill Electronic Co., Ltd.
- 2021: Invest in Trustbond Technology Corp.

II. Scope of Business

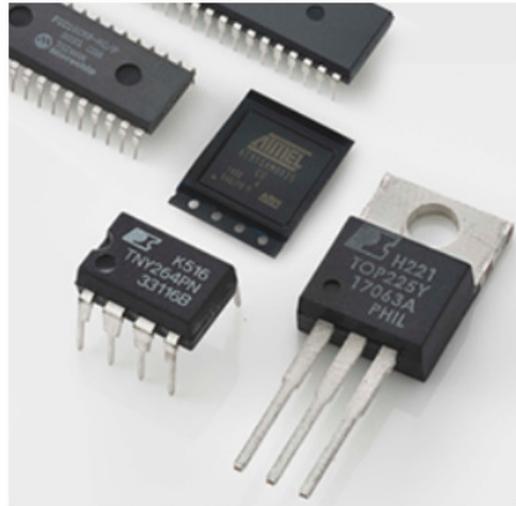

- Production and sales of electromagnetic wave prevention and static/surge protection components
- Manufacture and sales of magnetic winding components related to power supplies
- Production and sales of chip stacked/wire wound inductors
- Agent for U.S. API
- Other electronically-related components and materials, IC and other import/export trade businesses

Company Overview: Main Products

Operating Location: Trustbond Technology
(located in New Taipei City)

Trustbond Technology Corp.

Address: 2F., No. 152, Baoqiao Rd., Xindian
Dist., New Taipei City, Taiwan,
R.O.C.

Tel.: +886 2 8665 3309

Fax: +886 2 8665 3209

Website: <https://www.trustbond.com.tw/>

Tax ID No.: 29025439

Paid-in Capital: NTD20,000,000

Main Business Items:

Semiconductor, Distribution Agency for Active
and Passive Electronic Parts and CCFL LCD
T1 Lighting

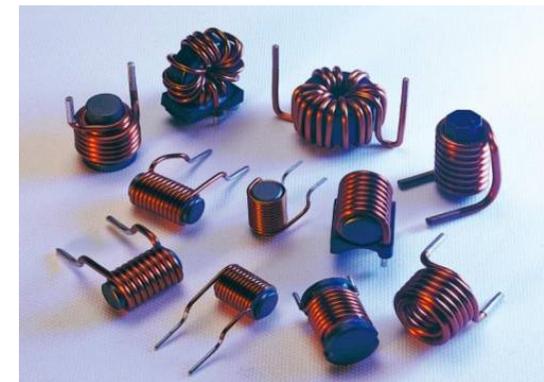

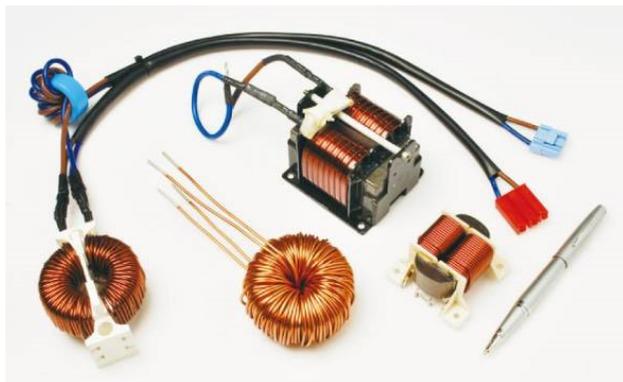

Operating Location: BWJC Plant (located in Taimei Town, Boluo County, Huizhou City)

- 10,000 square meters, 2-storey building + independent warehouse + tool room
- Specialize in magnetic parts and various, highly complex customized magnetic coils in limited amount (TS16949-verified)

Product Category	Monthly Production	Product Category	Monthly Production
Automotive magnetic parts	2,300K pieces	Magnetic coils (PFC/OP)	500K pieces
High current SMD magnetic parts	800K pieces	Magnetic coils (CMC/ST)	1,000K pieces

Industry Overview: Status and Development

The Industrial Technology Research Institute (ITRI) released the forecast results of Taiwan's manufacturing industry in 2021 and 2022 based on the overall domestic and foreign political and economic situation. The manufacturing output of 2021 was at NTD 23.06 trillion with an annual growth rate of 21.26%, which is the second highest rate in history. The economy of 2022 is expected to continue its growth and development given the expected economic restarts of various countries, strong international demand and domestic demand which is also picking up. It is estimated that the four major sectors of manufacturing industry will maintain a positive outlook, with the total manufacturing value reaching NTD 24.12 trillion and a yearly growth rate of 4.51%.

Company Overview: Correlation between Upstream, Midstream and Downstream Segments

Bull Will is positioning the wire-wound power components as the core product of the company and its subsidiaries. Wire-wound component is an inductor of passive components, and the relationship between the upstream, midstream and downstream of the passive component is explained as follows:

Industry Overview on Competition

Passive Components:

In 2022, the passive component market was affected by the weakening demand for consumer electronics such as mobile phones, laptops and TVs which corresponded to the decline of the standard passive components. Moreover, due to the impact of the pandemic in mainland China, the price of consumer passive components (MLCC) is expected to drop by another 3-6% in the second half of the year. The standard product market in mainland China has already experienced an oversupply situation. The planned inventory will be exhausted in the second quarter, but it will be postponed to the third quarter due to the impact of the closure of the city. China's lockdown measures are facing shutdown issues and supply chain impacts, causing global terminal sales to be even worse. However, the U.S. government has begun a cycle of interest rate hikes on the dollar. Aside from suppressing inflation, this move is representative of the economy entering a recovery and growth period which can be considered a move into the positive direction. It also allows manufacturers to usher the depreciation of the New Taiwan Dollar which has not been seen for two years and may be beneficial to some. Overall, it is estimated under mixture of pros and cons of 2022 that the output value of Taiwan's passive component industry will result in a slight decline.

Active Components:

The outlook of the semiconductor industry turns worsens in the second half of this year, with IC design factories put destocking as an operational priority and decreasing wafer casting. Some companies even paid liquidated damages to rid the heavy burden of long-term supply contracts. With the rapid loosening of wafer foundry production capacity and a sharp reduction in capital expenditure, equipment factories are looking at a conservative outlook for 2023 with the entire industry chain being gradually affected by the economic correction.

Operation Overview: Business Content, Market and Product Sales Overview

I. Business Content

- Production and sales of electromagnetic wave prevention and static electricity / surge protection components
- Manufacture and sales of magnetic winding components related to power supplies
- Production and sales of chip stacked/wire wound inductors
- Agent for U.S. API
- Other electronically-related components and materials, IC and other import/export trade businesses

II. Market and Product Sales Overview

- The global passive electronic components market size is expected to grow at a CAGR of 5.10% during the forecast period from USD 34.11 billion in 2021 to USD 46.87 billion in 2027
- With the expansion of unfavorable factors such as inflation, hikes in interest rates, the Russia-Ukraine war and China's pandemic lockdown, the demand for terminal markets has frozen sharply. All these factors affect not only the consumer markets for personal computers and mobile phones, but also the enterprises that have conducted staffing lay-offs and cost-cutting measures, and the field of commercial and industry control.
- The global semiconductor output value has come to a drastic slow-down this year and may drop a 3.6% next year. The ITRI estimates that the global semiconductor output this year will be about USD 618.5 billion which is 4% growth, a significant decrease from the 26.3% growth of 2021. The annual output value may decrease by 3.6% in 2023 to reach a low USD 596.4 billion.

Finance Overview: Statement of Comprehensive Income of Operating Results

	Annual	371.18	19.19	0.93	0.93	0.56
2022	Q1	139.82	17.18	0.17	6.28	5.36
	Semi-Annual	338.65	17.38	3.03	6.1	5.24
	Q3	486.2	18.49	3.27	6.14	5.21

1. Steady revenue growth in the past three years
2. In the past three years, the operating profit ratio and the pre-tax (after-tax) net profit ratio have all improved significantly
3. Net value per share continued increase, reaching 15.49 yuan in the third quarter of 2022
4. In the second half of 2022, the electronic industry generally had a high inventory level. The company controlled the inventory. In the third quarter of 2022, the inventory amount was only NTD 42,372,000 yuan, and the cash level was NTD 150,396,000 yuan.

Finance Overview: Dividend Policy, Capital Expenditure and Impact of Recent Major Events on Shareholders' Equity or Financial Statements

Dividend Policy:

The company's dividend policy is to cooperate with the current and future development plans, and takes into consideration of the investing environment, capital needs and foreign competition while taking into account the interests of shareholders and other factors. No less than 30% of the earning distribution will be distributed to shareholders as dividends every year. Dividends may not be distributed if the accumulated earning distribution is less than 10% of the paid-in share capital. When dividends are distributed to shareholders, they may be paid in cash or in stock, with the cash dividends no less than 50% of the total dividends.

Earning Distribution of 2021: NTD 3,600,000 (NTD 0.19441377/share) cash dividend

Capital expenditure and recent major events: None

Future Outlook

- Continue active execution of increasing income and reducing expenditure plan to streamline various management and marketing expenses
- Integration of China plant to save costs and increase efficiency
- Full develop the company's own patented PHD products and adjust product bundles to increase revenue and profit
- Seek for strategic investors to invest in the R&D of the company's technology, capacity expansion and channels for brand marketing in order to increase the marginal benefits of industry vertical or horizontal integration, and enhance company value and profitability
- Continue search for good companies to expand the company's operating scale through M&A

Others: Corporate Governance

Bull Will's Board of Directors plays a core role in the governance of the company. It not only provides strategic guidance on company operations, but also supervises the operating performance of the company's management team. As the highest governance body, it has established the Remuneration Committee, the Accounting Committee, the Auditing Department and General Manager, each of which performs its duties to assist the board in fulfilling its supervisory duties, so as to effectively implement various operating activities and create maximum benefit for its shareholders.

2022

1. Formed audit committee
2. Established the organizational regulations of the audit committee
3. Established communication methods between independent directors, internal audit supervisors and accountants
4. Established internal SOP for key information

Corporate Culture

Requirements of Production Unit:

***Quality,
Agility,
Accountability***

Employee Code of Conduct:
